

## ОБЗОР ПРОФИЛЕЙ

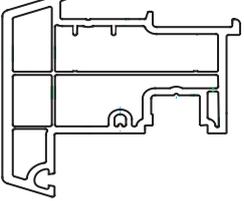

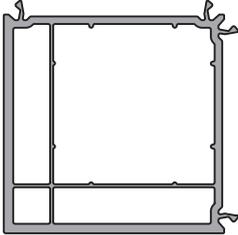

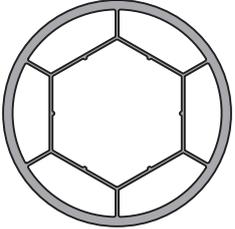

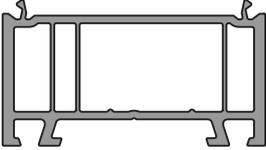

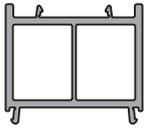

### ОСНОВНЫЕ ПРОФИЛЯ

|   |             |                               |
|---|-------------|-------------------------------|
|    | 30-01-00065 | Рама 60 мм.                   |
|   | 30-02-00065 | Створка 79 мм.                |
|  | 10-33-00065 | Импост 80 мм.                 |
| <b>ШТАПИК</b>   |             |                               |
|  | 10-09-000   | Штапик под стеклопакет 32 мм. |
|  | 10-08-000   | Штапик под стеклопакет 24 мм. |
|  | 10-10-000   | Штапик под стекло.            |

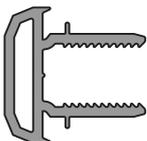

## ОБЗОР ПРОФИЛЕЙ

### ДОПОЛНИТЕЛЬНЫЕ ПРОФИЛЯ

|   |               |                                     |
|---|---------------|-------------------------------------|
|    | 11-12-000(13) | Штульп.                             |
|    | 11-16-000     | 90° соединитель.                    |
|  | 11-15-000     | Эркер.                              |
|  | 11-14-000     | Адаптер эркера.                     |
|  | 11-13-000     | Соединитель H-образный.             |
|  | 11-17-000     | Профиль доборный 35 мм.             |
|  | 11-11-000     | Профиль подставочный универсальный. |

УСТАНОВКА СТЕКЛОПАКЕТА

минимальный размер стоков воды, а также  
вентиляционных отверстий:  
отверстие 5x25 мм или круглое отверстие  $D=8$  мм.

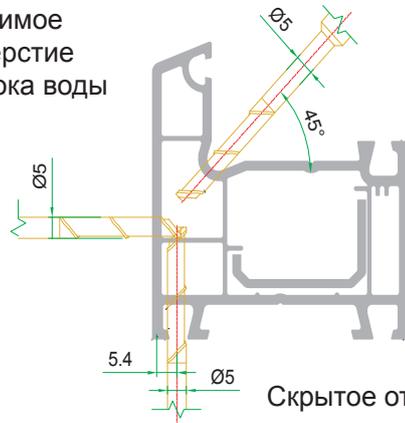

## ВОДОСЛИВНЫЕ ОТВЕРСТИЯ

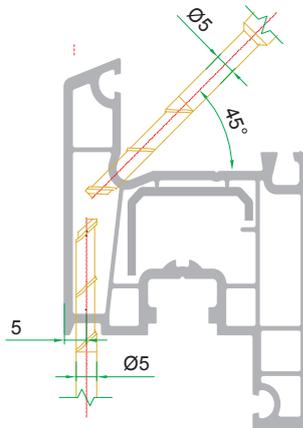

### рама

Видимое  
отверстие  
для стока воды

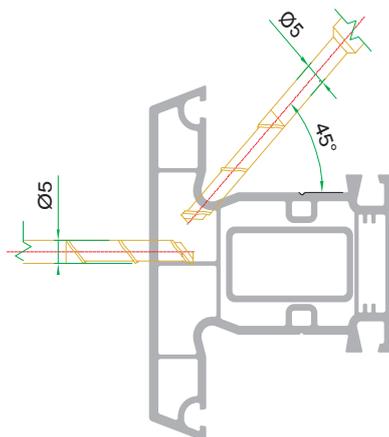

Скрытое отверстие  
для стока воды  
/в комбинации с отливом  
и подоконником/

### створка

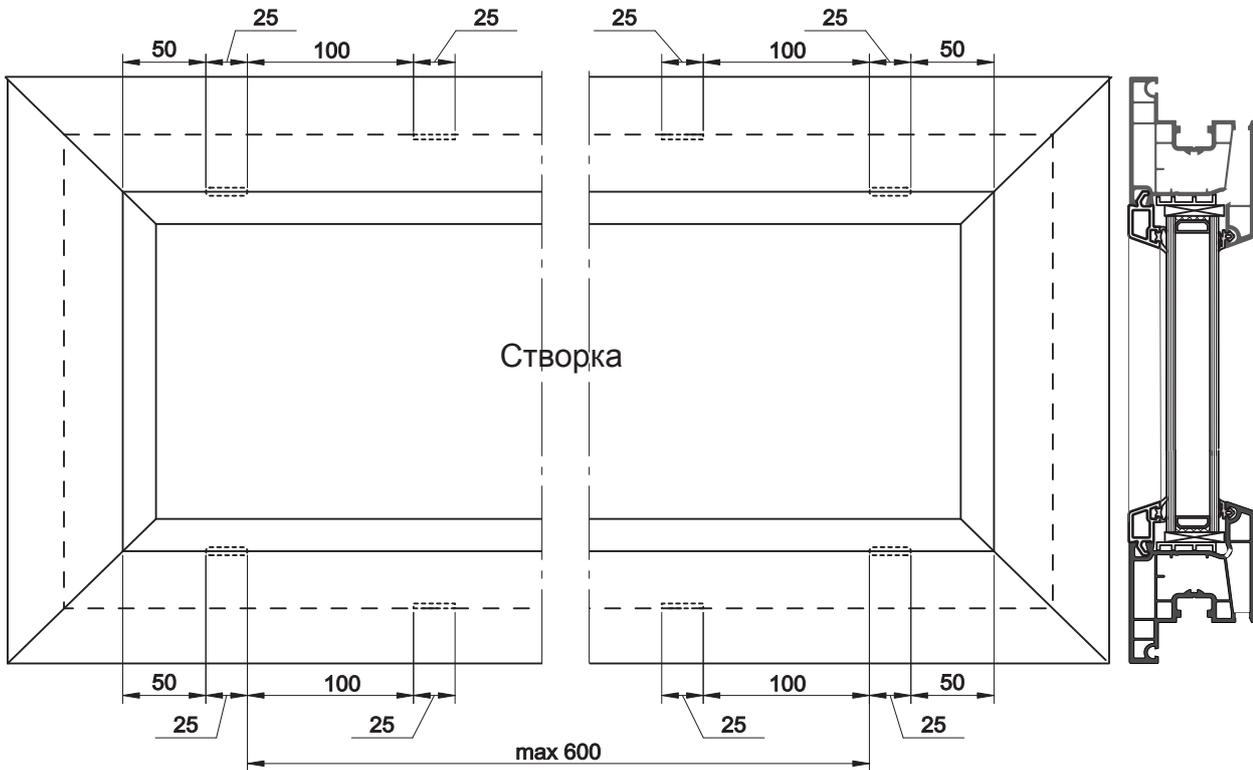

### ИМПОСТ

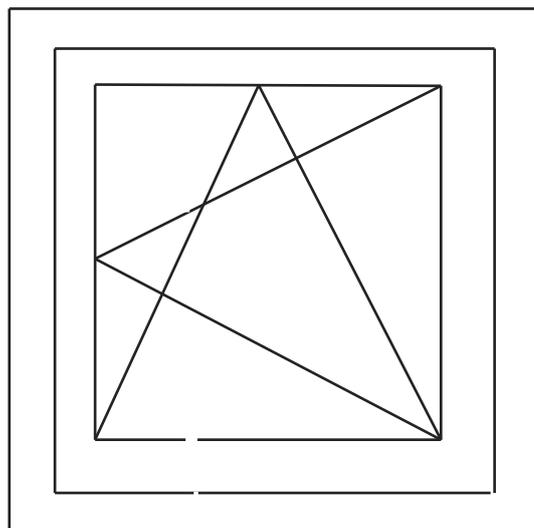

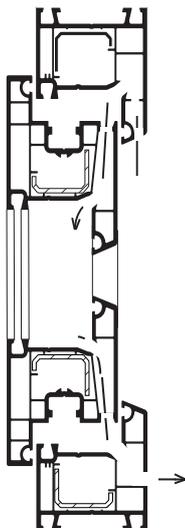

Обезвоживание за счет уравнивания давления пара
